-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 7, 9, 11, 12, 27-38, and 40-50 are rejected under 35 U.S.C. 102(b) as being anticipated by Kump, U. S. Patent 6,341,755.

3. Kump teaches an adapted **C** mounted to the top surface of a shelf, wherein the shelf has a plurality of apertures. The adapted comprises an elongated body 152, a plurality of legs 112, 116 extending from the body, at least one retaining foot 136 coupled to the an end of the leg, and a shoulder ledge 140 proximate an end of the leg. The adapted is made from a resiliently yielding plastic. (Column 4, line 3-4). The ledge 140 are adapted to fit the shelf aperture snugly, gripping the periphery of the aperture. (Column 7, line 7-9 and figures 10-11). Kump also teaches a portion of the adapted such as 50 or 150 spaced from the shelf. (Figure 5) The examiner contends that this space allows for airflow between the label-mounting portion 50 or 150 and the shelf or component mounted on the shelf.

With respect to claim 7, 31-33, 42, the distal edge of the member 140 corresponds to the ledge and the remainder of the member 140 corresponds to the stiffening member.

With respect to claim 9, 34, 43, Kump teaches the member or foot 136 having a camming surface 40 and a rounded lower end.

Allowable Subject Matter

4. Claims 13-16 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach a label holder as claimed in combination with a computer system component.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 27, 38, 47, 48, and 50 have been considered but are moot in view of the new ground(s) of rejection.

Since the applicant is not positively claiming the holder in combination with the computer component, Kump anticipates the claims drawn to only the holder.

The examiner will consider favorably limitation drawn to the shoulder and foot being configured such that the elongated body is spaced from the surface of the computer component.
